VOIP WC Call Unit

VOIP WC Call Unit

WC Call Unit is used in the bathrooms of patient rooms or similar areas for patients. There is a call reset button and an emergency call rope on the unit to start a voice conversation. In an emergency, patient pulls the rope for making an emergency call. When the rope is pulled, voice communication starts by calling the defined nurse call panel.

When the emergency help button is pressed on, the emergency help message goes to the nurse call panel and the defined system units (Dect, MCW and Pager).

Technical specification

Weight (g)	90 gr.
Width (mm)	185 mm.
Depth (mm)	30 mm.
Height (mm)	80 mm.
Rope Durability	Max 30kg
Operating temperature / Humidity	-10°C +60°C / % 30 %80 RH
Material	ABS/FR
Speaker	3 watt
Color	White
Communication	SIP, TCP/IP
Speech	SIP full Duplex
Protection class	IP55
Input	1xRJ45
